Embassy of Switzerland in Ukraine

RR RADENIA

Swiss Digital Hub @Kyiv

Organized by the Embassy of Switzerland in Ukraine in cooperation with Radenia AG
inviting to its first event of a series of seminars on disruptive technologies for leaders of Swiss business in Ukraine

Blockchain and distributed systems

Blockchain and related topics such as distributed ledgers or tokenization of real assets, ICOs or crypto-currencies are catching lots of attention globally. Business leaders, researchers and think tanks, academics and enthusiasts are looking for new ways of applying blockchain to existing economical models and transforming (if not creating) markets, services and new business paradigms.

What does blockchain technology really mean? What kind of opportunities and challenges it brings to a traditional sectors? How it can contribute into building new advantages or gaining efficiency for our businesses? These and other questions we would like to discuss with world-class expert who has practical experience in delivering blockchain-driven commercial solutions and platforms during our first event.

No technical knowledge required – event is for business executives. We would advice C-suite and other top business and operational leaders to attend the event.

Moderator	**Oleksandr Radchenko** CEO, Radenia AG radenia.com
Keynote speaker	**Dr. Pavlo Kravchenko** Co-Founder, Distributed Lab **Distributed Lab** distributedlab.com Dr. Pavel Kravchenko is a technology entrepreneur, cryptographer, software architect, blogger, author (amazon.com/dp/B07M9PD1K9), lecturer, public speaker and relentless dreamer. He has received his PhD in Cryptography in 2012. In 2006-2009 worked as a security engineer in Ukraine; in 2009-2013 was managing IT projects, including for financial services clients. He started his blockchain and cryptocurrencies career at Silicon Valley, and in 2014 co-founded Distributed Lab with a core mission to develop a cutting-edge enterprise tokenization solutions, laying the groundwork for the coming "Financial Internet".
